

Fred Dohmann – President, Advanced Aromatics, L.P.

Fred has over twenty-five (25) years experience in business operations management. Recent responsibilities, as VP Manufacturing, included the direction and coordination of all manufacturing aspects for Advanced Aromatics. Advanced Aromatics produces high purity Naphthalene derivatives and heavy aromatic solvents.

Fred's experience includes tenure as the Director of Operations for CDI Engineering in Beaumont, Texas. CDI provides process engineering services for the refining and petrochemical industries.

Prior to this, Fred was General Manager for a specialty metals business in Oklahoma which included profit/loss management of operations related to production of tantalum oxides. Business/Plant Manager for a (now owned by Solvay Solexis) fluoropolymer business serving the wire and cable market; responsible for market and application development of products sold into telecommunications wire and cable, industrial cables and aerospace applications. Additionally he was responsible for operational management for Chevron Chemical's LDPE (low density polyethylene) manufacturing in Orange, Texas
